

Lakes Council ready to monitor waterways

The recent article on volunteer lake monitoring indicates when area residents are given the opportunity to help take care of our lakes, they step up to the plate. The Winnebago Lakes Council, a newly formed non-profit group, is counting on that. Our aim is to involve citizens in sustaining the four lakes in the Winnebago system. We recruit lake and stream monitors, foster citizen networking and disseminate lake information. We are now enlisting area stakeholders in a planning process to manage aquatic invasive species. Our hope is to gain hundreds of volunteers and supporters to create a strong voice for our lakes and attract the resources we need to protect them. Contact us at winnebagolakes@yahoo.org.
